

Washing machine Type 360

Cleans gravure cylinders with solvent. Very good cleaning results due to rotation of the gravure cylinders and short spraying distances combined with a powerful washing pump. High washing capacity with equipment for several gravure cylinders. The solvent tank is separated from the washing chamber; hence emissions are considerably reduced. The machine can be adapted to various tasks with the appropriate accessories. The washing machine is type-examined and explosion-proof (category 1/2) in accordance with ATEX.

Dimension:

Wama 360-3

Number of gravure cylinders:	3
Max. length of cylinder:	2000 mm
Max. diameter of cylinder :	300 mm

Wama 360-5

Number of gravure cylinders:	5 Stück
Max. length of cylinder:	2500 mm
Max. diameter of cylinder:	300 mm

The machine size will be adapted individually to your needs in regard to number, length and diameter of the cylinders. Examples as mentioned below (different sizes on request)
